

Modern Media at school – pros & cons

France recently banned the smart phone entirely from school, where as other countries like Germany start new initiatives to incorporate more modern media, like the smartphone, tablet or whiteboard in class.

What about you? What do you think?

In our digital age, isn't a must to transport modern media in all areas of our all day life? Or should school be a distraction-free learning environment?

Task:

- ✓ Pick one kind of modern media, e.g. tablet computer, smartphone, etc.
- ✓ Think about the pros and cons of their usage in class.
- ✓ Structure your ideas consequently and present them in a vivid and appealing way.
- ✓ Use the following apps : pawtoon, genial.ly or bungee

Deadline: Bring your results to the Bad Tölz meeting in November.

In international groups you will discuss your results then and come to a joint understanding which kinds of modern media should be used in class.
