

The school of the future a.k.a. a "modern" school

When asking students about necessary changes at school, one of the first things they say is: "We want a more modern school."

But what does "more modern" mean? Some refer to the building, some refer to the way of teaching.

To actually make a lasting impact, a thought-through concept for a modern school or the school of the future is necessary.

Your task is now to develop such a concept which can be realized in the future and to present it in a short video.

Task: Our modern school/Our school of the future

- Every nation should be able to bring along at least **2 films presenting different kinds of schools** to Bad Tölz.
- Take into consideration the following aspects:
 - a student's needs
 - a teacher's point of view
 - the money question (= how to pay for it and who does so?)
- Every film should **not be longer than 10 minutes** and not shorter than 5 minutes.
- In your film **focus on the following aspects**, among others:
 - building & facilities
 - food
 - subjects
 - amenities
 - teachers & ways of teaching
 - school supplies
 - media usage
 - timetable etc.

Feel free to include more new aspects when you pitch your school of the future.

- In your film the pictures can be accompanied by an off-speaker, music, subtitles or you just make the pictures speak for themselves!
- But don't forget that the audience should not have any questions afterwards.
- Be creative & make it interesting/exciting/fun to watch!

Deadline: Bad Tölz meeting
